DOCTOR HOME CARE

2024-06-20

TO WHOM IT MAY CONCERN

This is to certify that Ms. Rakshya Bastola student of Bsc. CSIT affiliated to TU has successfully completed her 3 months internship from 18 March, 2024 to 18 June, 2024 in our organization.

During this internship, worked closely as a part of team for different project as a Flutter Developer in our organization. She was found to be hardworking and innovative during the internship period.

We wish her all the best for future endeavors.

Dr. Prashanta Bhattarai

ACKNOWLEDGEMENT

It would not have been possible for me to successfully complete my internship without the essential support and help of many people and organizations. First of all, I would like to express my sincere gratitude to **Mr. Prashanta Bhattarai** for giving me the amazing chance to intern at **Doctor Home Care Pvt. Ltd.** I have benefited much from this experience, which has helped me develop my skill set and increase my interest in mobile development.

Additionally, I would like to sincerely thank **Mr. Saurav Kunwar** for his constant understanding and support during my internship. His understanding and direction have been key to my development. I have to thank my supervisor in particular for all of their hard work in making sure that this report complies with all legal requirements and ethical principles. Their assistance has been invaluable.

I want to express my gratitude for all of the amazing work and assistance that my mentor, supervisor, and all of the "**Shreeyantra College**" associates provided for me. It would not have been feasible to accomplish this without their positive cooperation.

Lastly, I would want to sincerely thank all of my friends and everyone else who helped me succeed throughout this internship, whether directly or indirectly. Your assistance is much appreciated.

Rakshya Bastola
(24594/076)

ABSTRACT

During my internship at Doctor Home Care Pvt. Ltd. in Gairidhara, Kathmandu, I gained invaluable practical experience in client support systems, agile workflows, and system development. This internship provided a comprehensive learning opportunity, allowing me to work on impactful projects and learn from experienced professionals. One of the significant projects I contributed to was the **“Hamro Health User Application”**. This app is designed to help parents oversee their children's medical needs, such as scheduling lab tests and managing medications, ensuring timely care during school hours. My role involved using Flutter to design the user interface (UI), focusing on creating an intuitive and user-friendly experience. This project taught me the importance of user-centric design, balancing functionality with ease of use, and considering the needs and preferences of end-users. Working on this app underscored the necessity of creating accessible solutions to enhance user engagement and healthcare service delivery.

Another key project was the **“HH Professionals app”**, aimed at assisting medical professionals in managing services for nursing homes and pathology labs effectively. My contributions included designing and optimizing the app's UI to enhance usability for healthcare providers. This experience reinforced my skills in software development and UI design, highlighting the need for efficient tools that support healthcare professionals in delivering high-quality care. Additionally, the internship exposed me to the practical application of agile workflows. The iterative approach allowed our team to adapt quickly to changes, implement feedback, and deliver incremental improvements. Collaborating with team members taught me valuable lessons about effective teamwork, clear communication, task delegation, and mutual respect in achieving project goals. The mentorship from experienced professionals provided me with insights into best practices and industry standards, accelerating my learning and professional growth. This opportunity not only enhanced my technical abilities but also deepened my appreciation for the role of innovative solutions in improving healthcare accessibility and quality.

Keywords: Flutter, Dart, Health Services, Lab tests, mobile phone

CHAPTER 1: INTRODUCTION

1.1 Introduction

This internship report provides a thorough overview of the excellent experience I had while working as an intern at Doctor Home Care Pvt. Ltd. in Gairidhara, Kathmandu. I had the priceless chance to fully immerse myself in the fields of client support systems, agile techniques, and software development thanks to this internship. I had the honor of learning real-world skills and obtaining firsthand experience during my internship under the direction of our mentor and seasoned professionals. It also taught me important lessons about productive teamwork and collaboration.

The Hamro Health application offers a number of useful functions by combining a powerful software platform with an intuitive mobile app. A few of these include of daily health reports, prescription reminders, live tracking of health services, booking services, analytics of health data, and more. With its wide range of benefits, improved service accessibility, and increased operational efficiency, Hamro Health fundamentally revolutionizes the delivery of healthcare.

The ability to view health service activities in real-time via the mobile application is one of Hamro Health's prominent features. It offers thorough tracking of health service delivery, in contrast to basic status updates, giving a more accurate picture of the whole healthcare process. Additionally, consumers have the freedom to remotely control their health services, booking appointments, and keeping an eye on their health data from any location using a mobile device.

.

1.2 Problem Statement

Accessing and managing health services can be difficult for both patients and healthcare providers, which can cause delays and lower-quality care. Patients find it difficult to make appointments, take medicines, and obtain services from their homes or places of education, and clinicians require more advanced tools to manage patient care effectively and promptly. Real-time tracking and remote administration features are also lacking. By providing

tools for live service tracking, appointment scheduling, medicine reminders, health data analytics, and daily health reports, the Hamro Health app improves accessibility, operational effectiveness, and the patient experience in general.

1.3 Objectives

The internship program was carried out according with the eighth semester academic requirement of the BSC CSIT. Following are the objectives of this internship :

- To develop better communication skills.
- To be able to work in real-world workspace.
- To gain exposure to organization's daily operations.
- To acquire new capabilities and use them to address practical problems.
- To acquire practical experience and instructions in applying our skills to solve challenges.

1.4 Scope and Limitation

1.4.1 Scope

- Booking Services: Allow users to book, reschedule, or cancel appointments easily from their mobile devices.
- Medication Management : Provide a platform for users to take medications and receive reminders for medication intake.

1.4.2 Limitations

- The application depends on continuous connectivity.
- The efficiency of health data analytics and services depend on data accuracy.
- The accuracy of data depends on users' technical proficiency.

1.5 Report Organization

- Chapter 1: Introduction
 - This chapter consists of introduction, objectives, scope and limitations regarding the project.
- Chapter 2: Organization Details and Literature Review
 - This chapter consists of organizational hierarchy and working domains.
- Chapter 3: Internship Activities

- This Chapter consists of the activities performed on the project during the internship period.
- Chapter 4: Conclusion and Learning Outcomes
 - This chapter consists of the summary of entire internship and the things that I learnt after the completion of the internship program.

CHAPTER 2: ORGANIZATION DETAILS AND LITERATURE REVIEW

2.1 Introduction to Organization

Based in Gairidhara, Kathmandu, Doctor Home Care Pvt. Ltd. is a preferred and reputable health care provider that was founded more than four years ago. The organization provides services for patients at home and in educational institutions with a wide range of trustworthy health services. Doctor Home Care guarantees that kids receive appropriate medical attention during school hours, greatly improving their general well-being, by assigning dedicated school health nurses.

The Hamro Health User Application is one of the advanced technologies and applications that the company uses to offer easy access to healthcare services. In order to keep its clients' trust and loyalty, Doctor Home Care is dedicated to upholding the greatest standards of service quality. The company's goal is to surpass client expectations by improving healthcare accessible and providing reliable medical services. The mission of Doctor Home Care is to continuously enhance the health and well-being of the community it serves by emphasizing innovation, client happiness, and committed service.

Table 1.1 Contact detail of Company

Organization	Doctor Home Care Pvt. Ltd
Address	Gairidhara, Kathmandu, Nepal
Telephone number	01-5915677
Email	info@hamrohealth.com
Website	www.hamrohealth.com

2.2 Organizational Hierarchy

To achieve efficient operations, companies organize their internal structures according to their operational functions. Additionally, Hamro Health Pvt. Ltd. adheres to a practical organizational structure that supports every activity the business conducts. This organizational structure makes it easier for different tasks to be carried out smoothly. The organizational hierarchy of the corporation is structured in a hierarchical manner, with the highest level of command reporting to the lowest. However, there are differences in the ways that information circulates within Doctor Home Care Pvt. Ltd.

Fig 1.1 Hierarchical Structure of the Company

2.3 Working Domains of Organization

Doctor Home Care Pvt. Ltd. offers a wide range of services within the domains of health service ,web and application development. The organization has following areas of expertise. applications with a team of skilled developers.

- App Development

Doctor Home Care provides service in developing high quality android and ios mobile applications with a team of skilled developers.

- Web Development

This company has been able to gratify number of clients creating highly customized website and software.

- Digital Marketing

Doctor Home Care promotes businesses through social media marketing through Facebook, Instagram, etc.

- Graphics Design

With a team of highly qualified graphic designers, Doctor Home Care offers wide range of services in graphic design.

2.4 Description of Intern Department

I worked for a total twelve weeks as an intern at Doctor Home Care Pvt.Ltd. The details of my internship period in the organization are summarized in the following table:

Table 1.2 Duration of the Internship

Start Date	2080/12/05
End Date	2080/03/05
Total Duration	12 weeks
Position	Flutter Developer Intern
Mentor	Saurav kunwar
Office Hour	7:30 AM – 3:30 PM

2.5 Literature Review

Healthcare software encompasses a broad category of applications and systems designed to facilitate various aspects of healthcare delivery, management, and patient interaction. These software solutions are integral to modern healthcare practices, aiming to improve efficiency, accuracy, and patient outcomes.(Mayer, Moreno, et al., 2021).

Mobile health (mHealth) applications have transformed healthcare delivery by offering accessible, convenient, and personalized services through mobile technology. These applications are particularly valuable in resource-limited settings, providing solutions for health education, remote diagnosis, appointment scheduling, and chronic disease management. This literature review focuses on several prominent mHealth applications to explore their impact and effectiveness in healthcare.(Hamine, Gerth-Guyette, et al., 2015).

Babylon Health, based in the UK, utilizes AI-driven health assessments, telemedicine consultations, and health monitoring to provide personalized health information and connect users with healthcare professionals remotely . Research has shown its effectiveness in reducing the burden on traditional healthcare systems and improving access to medical advice, enhancing patient outcomes and satisfaction.(Richmond, Epelman, et al., 2019)

Ada Health, another AI-powered platform, assists users in understanding symptoms and finding appropriate care through personalized diagnoses and recommendations . It has demonstrated high accuracy and user satisfaction, serving as an initial diagnostic tool before seeking further medical consultation.(Chan, Zhang, et al., 2020).

Doctor on Demand, operating in the US, offers video consultations with board-certified physicians, psychologists, and psychiatrists, providing convenience and immediate access to healthcare professionals . This platform has been widely adopted for its efficiency in reducing in-person visits and healthcare costs.(Ray, Shi, et al., 2018)

Practo, an Indian mHealth application, integrates doctor appointments, telemedicine, health records management, and online medicine delivery to simplify healthcare access and management . It has significantly enhanced healthcare accessibility and patient engagement in India, particularly in urban areas.(Basu, Srivastava, et al., 2019)

HealthTap provides virtual consultations, AI-driven symptom checkers, and access to a vast medical knowledge base, ensuring reliable and timely medical advice . This platform has been effective in improving health outcomes through its user-friendly interface and robust AI capabilities.(Smith, Tang, et al., 2021)

These applications share a common goal of improving healthcare accessibility, enhancing patient outcomes, and promoting health literacy through innovative use of technology. They leverage AI and machine learning to deliver personalized health recommendations and improve diagnostic accuracy, thereby increasing patient engagement and adherence to treatment plans. Despite their benefits, challenges such as data privacy concerns, regulatory compliance, and the digital divide remain significant considerations in the adoption and implementation of mHealth solutions (Mayer, Moreno, et al., 2021).

mHealth faces significant challenges related to data privacy, regulatory compliance, and bridging the digital divide. Mayer, Moreno, et al. (2021) discuss the evolving regulatory frameworks for mHealth, highlighting progress and challenges in ensuring safety and efficacy. Effective regulation is crucial to safeguard patient data and ensure the ethical use of AI in healthcare settings.

In conclusion, mHealth applications like Babylon Health, Ada Health, Doctor on Demand, Practo, and HealthTap are instrumental in transforming healthcare delivery, making it more accessible, efficient, and patient-centric. Continued advancements in technology and regulatory frameworks are crucial to further enhance their impact and ensure safe and effective use in diverse healthcare settings.

CHAPTER 3: INTERNSHIP ACTIVITIES

3.1 Roles and Responsibilities

The duties assigned during the internship at Doctor Home Care Pvt. Ltd. were diverse and aligned with the organization's objectives as well as the internship program's prerequisites. I was responsible for a range of tasks as an intern. Building the user interface and learning how to use APIs were the two main goals of the twelve-week internship. The mentor assigned me most of the frontend work because he knew exactly what I was interested in. A summary of some of the primary responsibilities and tasks of an intern is provided below.

- Complete the tasks assigned by the mentor.
- Work together with the development team to get the projects started.
- Give the mentor updates on a regular basis.
- Develop self-learning ability and apply the subject matter to solve real world problem and seek mentor's assistance as necessary.

3.2 Weekly Logs

Table 1.3 Weekly Logs

Week	Activities	Approval By Mentor
1 st Week	• Learn the fundamentals of Dart, covering variables, data types, and basic functions. • Begin setting up the Flutter development environment and explore widget basics.	
2 nd Week	• Deepen your understanding of Flutter widgets, including stateless and stateful widgets. • Start building a simple Flutter	

	app to gain hands-on experience with widget usage.	
3 rd Week	• Begin the design and development of the user interface (UI) for the Hamro Health Application. • Create wireframes and UI mockups, focusing on integrating Google Maps for real-time position visualization.	
4 th Week	• Continue UI development for Hamro Health, concentrating on creating intuitive and user-friendly interface components. • Implement UI elements for displaying real-time location, data.	
5 th Week	• Begin implementing RESTful APIs to fetch real-time location data for Hamro Health from Backend	
6 th Week	• Implement the real-time data visualization feature using Google Maps for Hamro Health. • Constructed chat feature.	
7 th Week	• Implemented service booking feature. • Enhance the user experience by adding profile customization features.	

8 th Week	• Simultaneously, refine the HH Professionals App, ensuring seamless booked services and health report uploading functionality. • Work on the app's user interface to enhance the user experience.	
9 th Week	• Optimize the both apps for robust performance and real-time push notifications and in - app messaging. • Enhanced security of applications by increasing validation.	
10 th Week	• Implemented payment gateway using khalti and stripe.	
11 th Week	• Finalize apps for deployment in app store submissions and documentation.	
12 th Week	• Finalize apps for deployment in play store submissions and documentation.	

3.3 Description of the project involved during internship

3.3.1 Hamro Health User Application: Health Service User Application

The Hamro Health User App is a mobile health application designed to enhance healthcare accessibility and efficiency. Developed using Flutter, it offers features such as

appointment scheduling, medication reminders, and teleconsultations, catering to users' healthcare needs from their homes. Real-time tracking of health services and school health nurse management ensure timely and effective healthcare delivery, especially for students. Despite benefits like improved healthcare access, challenges include internet dependency and data security. Future enhancements may include AI integration for predictive analytics and IoT for real-time monitoring, promising further healthcare improvements. The key features of these app include:

- Booking health services from anytime, anywhere through the app.
- Facilitates monitoring and management of students' health by assigning school health nurses, ensuring timely medical attention during school hours.
- Securely manages health records and information.
- The app sends timely reminders for medication doses, enhancing adherence to treatment plans and improving health outcomes.

3.3.2 HH Professionals:

The HH Professionals App is designed to streamline healthcare service management for professionals such as pathology labs and nursing homes.

- **Functionality:** Providing efficient health care services to the users and analyzing data of patients.
- **Key Features:** Service Management, Real Time Updates, Health care analytics, Integration Capabilities.

3.4 Tasks/Activities Performed

During my 12 weeks of internship at Doctor Home Care Pvt. Ltd. I gained a lot of experience and tackled some complex coding challenges, participated in team meetings and pursued mentoring from professional flutter developers to improve my skills and contribute towards the projects. Below are the activities performed during my internship period.

- **Research and Learning:**
Explored online courses and documentation to learn Dart programming, Flutter framework, and various packages.
- **Widget Advance:**

Work on Flutter apps (e.g. Hamro Health User App, HH Professionals) to gain proficiency in working with widgets and layouts.

- Collaborative Prototyping:
Collaborated with a team to create UI prototypes using the Flutter widget library, gaining experience in teamwork and UI design.
- Project Involvement - Hamro Health User App:
Actively contributed to the ongoing Hamro Health User App project by designing the UI, implementing functionalities, and handling APIs.
- Layout and Design Expertise:
Acquired proficiency in using Flutter layout and design principles to create visually appealing and user-friendly interfaces.
- State Management Proficiency:
Explored and implemented various state management approaches in Flutter, including Getx, Provider, and BLOC, gaining a deep understanding of state management concepts.
- Code Quality Assurance:
Utilized Flutter debugging tools and widget tests to ensure code quality and application stability, enhancing the reliability of Flutter applications.

CHAPTER 4: CONCLUSION AND LEARNING OUTCOMES

4.1 Conclusion

I had a fantastic opportunity to work with seasoned developers on real-world projects and day-to-day operations during my internship program at Doctor Home Care Pvt. Ltd. I was completely absorbed in a variety of fascinating and important duties. It has assisted me in improving my abilities and knowledge. Through my involvement in actual tasks, this internship has enabled me to acquire practical expertise. In addition to honing my technical skills, this internship allowed me to gain experience in project management, collaboration, and communication with managers and seniors.

Upon reflection on my internship, I am certain that the skills and understanding I have acquired will provide a solid basis for my upcoming pursuits in the mobile application development industry.

In summary, my internship proved to be highly advantageous for both my professional and personal growth. My expertise from this internship will be useful for opportunities in this industry in the future. I was able to hone my technical skills, embrace group learning, and completely engross myself in the crucial innovation interface. Without a doubt, this event has altered my perspective, spurred me to seek technical advancements, and driven me to implement meaningful digital solutions to bring about beneficial improvements.

4.2 Learning Outcome

My internship experience was packed with discoveries, tests, and advancements that led to a range of significant learning outcomes that enhanced both my professional and personal growth. Below are some of the major lessons that I learned:

- Gained a better experience of the workplace culture and market.
- Engaging with developers within the organization and industry broadened my professional network, making connections, learning from experienced persons led to have meaningful insights and future opportunities.

- This internship encouraged me to put the academically acquired theoretical knowledge into practice. It enabled me to fill the knowledge gap between what I learned in the classroom and the actual business practices by participating in real world projects.
- Gained a hands-on experience in application development by working on a team to contribute in app development.
- This internship pushed me out of my comfort zone, resulting in personal and professional growth, overcoming obstacles, achieving goals and contributing to projects.
